#### A Letter From Executive Director Jeff Johnson and Board President Mitch Peterson

Our amazing team continued to adapt in 2021 to the lingering complications of COVID. In addition to certifying 41 new teams and creating new ways to serve our clients and volunteers both remotely and in person, we completed a five-year strategic plan and began implementing a very ambitious work plan focused on three main goals:

- Better serving our clients and engaging and supporting our volunteers, staff and supporters
- Significantly increasing our profile in Minnesota and Wisconsin and reaching into new communities in our area
- Serving more people with disabilities in creative new ways, including through the placement of facility dogs and skilled home companions

And, as always, we are focused on the unique importance to our organization of each of our five "pillars": clients, dogs, volunteers, donors and staff.

This is an exciting time for Can Do Canines! Thank you for being part of this chapter in our 32-year history.

Mitch Peterson Board President

# Oxley's Ears & Four Paws Compensate for What Zachary Has Lost

Zachary was in eighth grade when he contracted bacterial meningitis. Zack had to have his right hand amputated above the wrist, as well as the fingers and thumb on his left hand and both of his legs below the knees. He also lost most of his hearing.

What he didn't lose were his fighting spirit and positive attitude. After being released from the hospital, he and his family began to discuss getting an assistance dog. They soon discovered Can Do Canines, and Zack was matched with a beautiful yellow Labrador Retriever named Oxley, skilled to help with both hearing and mobility tasks.

COMBINATION SKILLS TEAM

The training Zack and Oxley have implemented in their lives is far-reaching, given Zack's needs. Although Zack now uses a power chair, has prosthetic legs, uses pincers for grasping and has had cochlear implants placed in his ears, Oxley eagerly complements Zack's life by alerting him to sounds, tug-ging open doors and picking up and retrieving items.

Recognizing Oxley as "empowering," Zack is not only employed as an assembly worker, but he also volunteers as a custodian at the local fire station and at the community food pantry.

To those who helped make this happen, Zack says, "Thanks for giving me a dog that adores working." His mom, Desiree, agrees. "We appreciate so much that [Can Do Canines assistance dogs are] provided free of charge for people that need them." The reason for her gratitude is clear. She states, "I feel much safer about Zack being home alone because I know he's not alone. There's somebody there that's going to help him, that's going to alert him, that's going to give him the assistance he needs without a person being there."

# MOBILITY

Mobility Assist Dogs work with people who have mobility challenges and other needs. They pick up and carry objects, turn on lights, open doors and help pay at tall counters.

## **DIABETES**

Diabetes Assist Dogs detect low blood sugar levels by sensing a change in their partner's breath odor. The dog alerts their partner by making physical contact.

### SEIZURE

Seizure Assist Dogs respond to a person having a seizure by licking their face, retrieving an emergency phone and alerting other family members.

Terri & Peaches

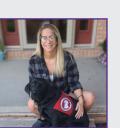

Catie & Ryder

### HEARING

Hearing Assist Dogs alert a person who is deaf or hard of hearing to sounds by making physical contact with them and leading them to the source of the sound.

# 2021 AT A GLANCE

**3,306** people donated a total of **\$1,574,588** and helped us match more teams.

**363** active working teams received ongoing training and support from staff.

837 volunteers helped us in a variety of ways.

Approximately 644,733 hours were clocked by volunteers.

41 new teams were certified in 2021.

164 inmate handlers raised and trained our dogs-in-training.

## THANK YOU

Can Do Canines relies on volunteers and donors to help make our mission a reality. Every single contributor makes a difference. Thank you for helping us provide life-changing assistance dogs.
